

Appl. No. 10/604,789
Amdt. dated May 12, 2005
Reply to Office action of April 07, 2005

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

5 **Listing of Claims:**

Claim 1 (Original): An electronic apparatus comprising:

- a housing comprising a plurality of holes on a first side wall;
- a transparent dust-proof member installed approximately parallel to the first side wall;
- a motherboard installed on a second side wall inside the housing;
- 10 a processor installed on the motherboard inside the housing for processing programs and data; and
- a memory installed on the motherboard inside the housing for storing programs and data.

- 15 Claim 2 (Original): The electronic apparatus of claim 1 wherein the transparent dust-proof member is installed inside the housing.

Claim 3 (Original): The electronic apparatus of claim 1 wherein the transparent dust-proof member is installed outside the housing.

20

Claim 4 (Original): The electronic apparatus of claim 1 wherein the transparent dust-proof member includes glass materials.

Claim 5 (Original): The electronic apparatus of claim 1 wherein the transparent
25 dust-proof member includes plastic materials.

Claim 6 (Original): The electronic apparatus of claim 1 wherein the transparent

dust-proof member is installed on a side of the plurality of holes and adheres to the housing.

5 Claim 7 (Currently Amended): The electronic apparatus of claim 1 wherein the transparent dust-proof member is installed on a side of the plurality of holes and ~~separated from the housing.~~

10 Claim 8 (Original): The electronic apparatus of claim 1 wherein the first side wall is not neighboring to the second side wall.

15 Claim 9 (Original): An electronic apparatus comprising:
a housing comprising a plurality of holes on a first side wall;
a transparent dust-proof member inserted inside the plurality of holes;
a motherboard installed on a second side wall inside the housing;
a processor installed on the motherboard inside the housing for processing programs
and data; and
a memory installed on the motherboard inside the housing for storing programs and
data.

20 Claim 10 (Original): The electronic apparatus of claim 9 wherein the transparent dust-proof member includes glass materials.

25 Claim 11 (Original): The electronic apparatus of claim 9 wherein the transparent dust-proof member includes plastic materials.

Claim 12 (Original): The electronic apparatus of claim 9 wherein the transparent dust-proof member is inserted in the plurality of holes and adheres to the housing.

Appl. No. 10/604,789
Amdt. dated May 12, 2005

Claim 13 (Currently Amended): The electronic apparatus of claim 9 wherein the transparent dust-proof member is inserted in the plurality of holes ~~and separated from the housing.~~

5 Claim 14 (Original): The electronic apparatus of claim 9 wherein the first side wall is not neighboring to the second side wall.

Claim 15 (Original): A housing for a computer, the housing comprising:

- a first side wall for mounting electromagnetic radiation producing circuitry;
- 10 a second side wall comprising a metal net of a fineness capable of substantially preventing electromagnetic radiation generated by the circuitry from passing through the second side wall in quantities greater than a predetermined limit, a plurality of holes formed by metal in the metal net for providing visual access to the interior of the housing; and
- 15 a substantially transparent dustproof member installed approximately parallel to the metal net such that dust is prevented from passing through the plurality of holes into the interior of the housing.

Claims 16-17 (Cancelled)
